

# SOLO

a new generation  
of electronic target

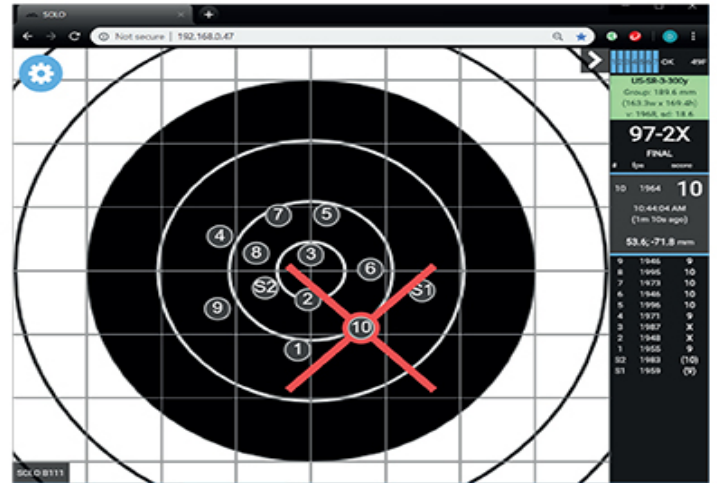

Silver Mountain Targets brings the technology of an acoustic E-target within reach of the individual shooter. No longer are expensive E-targets for large ranges only. Now you too can benefit from the advantages of an electronically scored target, right on your own property or range. Spend your day shooting, not walking between target and firing line!

**SOLO** is the fourth generation of Electronic Target System designed and manufactured by Silver Mountain Targets, the world leader in open sensor target systems.

## SOLO Electronic Target System

- An electronic target system capable of accurately reporting shot location, value, & terminal velocity at distances of 1000 yards or more.
- Easy to setup, eliminating trips to the target to check groups, paste holes, or reface targets
- Can be configured for larger multi-target ranges with the addition of a server
- Completely wireless communications to your WIFI-capable display device
- Self-sufficient, no external power required
- SOLO sensors attach to your target and acoustically detect incoming supersonic bullets

## Comes with everything needed to start shooting!

- 4 sensor mounting plates
- 4 dual-sensor arrays (8 sensors total)
- 4 color coded sensor cables
- T-SOLO Target-Line measurement unit
- F-SOLO Firing Line WIFI access point
- Two rechargeable battery packs
- Quick start pictorial guide

You supply the target frame and a WIFI capable display.

Mount sensors to your target frame, turn it on and **SHOOT!**

**The World Leader in Open Frame Electronic Target Systems**
